"АРАСАН" доктор Эрик 💨 💧 💥

Group · 154 members

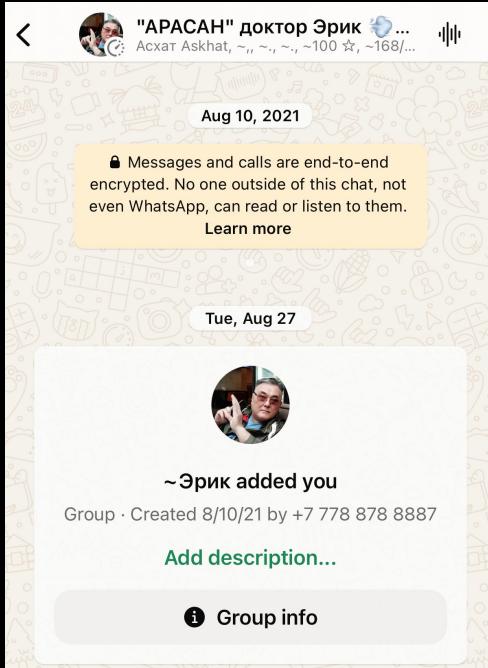

Call

Search

Erik the gatekeeper

- Erik literally controls who enters the group, reinforcing his centrality.

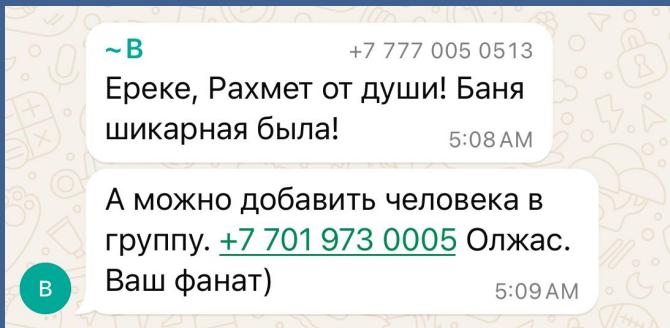

- Erik continues to grow his following, much like a shepherd gathering his flock.

Erik the revered

Erik, thank you from the soul! The banya was spectacular ...

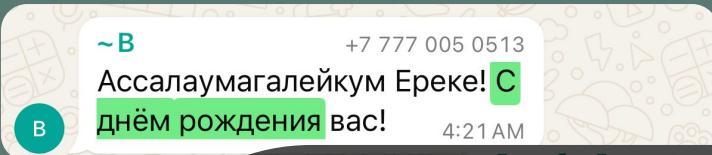

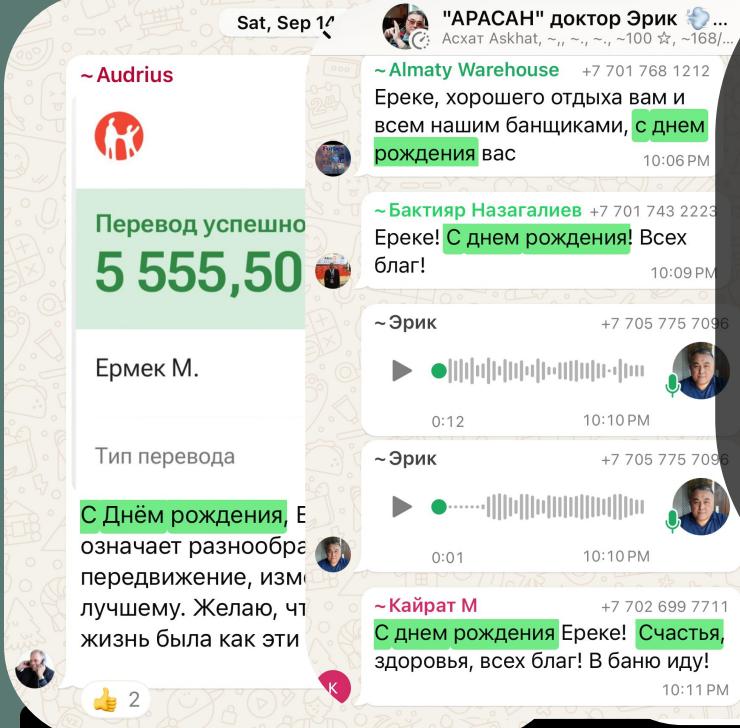

May I add someone to the group? His name is Olzhas. – your fan :)

[9/2/24,
5:08:37 AM]

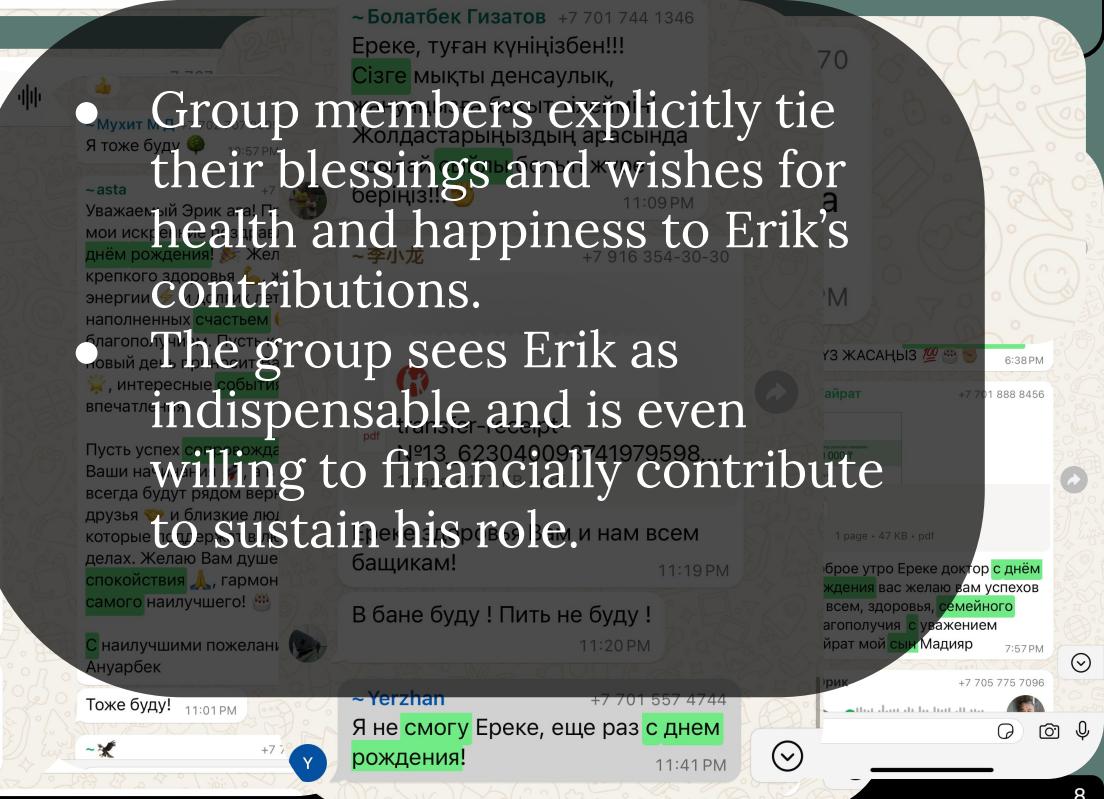

- Erik's efforts are met with heartfelt gratitude, showing the near-spiritual significance of his contributions.
- Erik's fans respect his leadership and publicly defer to his authority.

Erik the revered

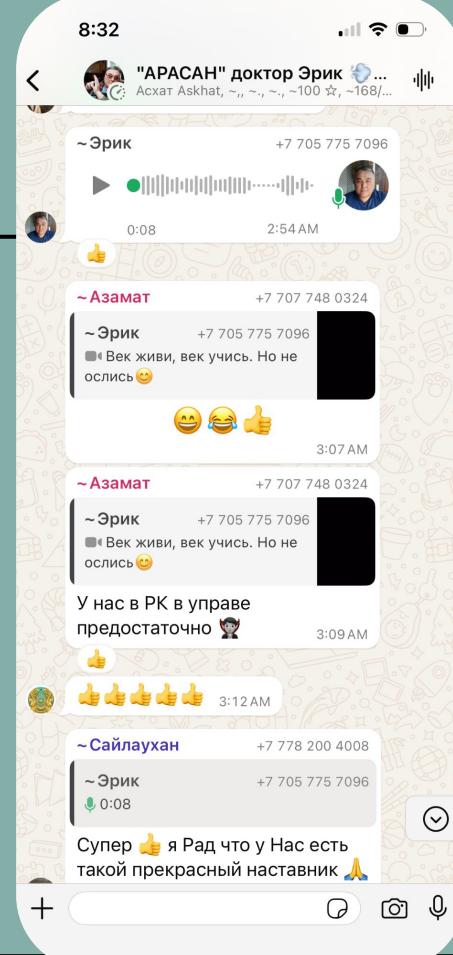

Group members explicitly tie their blessings and wishes for health and happiness to Erik's contributions.

The group sees Erik as indispensable and is even willing to financially contribute to sustain his role.

Erik the orator

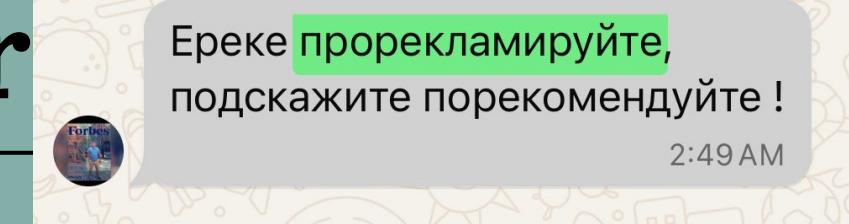

- Erik often communicates through voice memos. The immediate responses from the group—thumbs up and expressions of gratitude—suggest his words hold sway.
- Erik's frequent use of voice memos hints at his preference for spoken word, adding to his mystique.

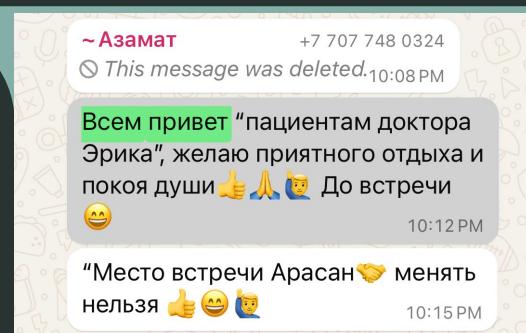

Erik the spiritual leader

- Members look to Erik for guidance, placing him in a role of authority even beyond the banya.
- Members see themselves as part of a select in-group. Dedicated acolytes reinforce identitarian control
 - “Patients of Doctor Erik”

Hello to all
“patients of
Doctor Erik,” I
hope everyone
has a pleasant
rest and peace
of mind ...
meeting place is
Arasan.
Changing is
NOT allowed

Erik, advertise, advise, recommend!

Комплексная иммунотерапия — авторская методика Dr.Eric

Иммунотерапия (лат. *immunis* свободный, избавленный от чего-либо + греч. *therapeia* лечение) — раздел практической иммунологии, задача которого — лечение иммунологическими препаратами, которые воздействуют прицельно на иммунную систему: препаратами антител или сывороток, моноклональными антителами, препаратами микробного происхождения, цитокиновая и антицитокиновая терапия, клеточная терапия. Иммунотерапию в качестве вспомогательного метода применяют при инфекционных, онкологических заболеваниях, в этом случае чаще сочетают с лечением [антибиотиками](#) и [химиотерапией](#). Иммунотерапия показана при первичном нарушении работы иммунной системы — [иммунодефицитах](#), аутоиммунных заболеваниях.

Dr.Eric — Моя История

1981-1983 годы проходил военную службу в Афганистане, в результате которой получил серьезные ранения, и через глубокие раны был занесён Гепатит С.
